

Bruno Murta Sampaio

Quality Assurance Manager / Game Platforms / Automation Leadership

Canada • b.murta.sampaio@gmail.com • +1 343 254 9700 • www.linkedin.com/in/brunomurta

Result oriented, hands-on QA leader with 9+ years focusing on user experience across gaming, web, and mobile platforms. Track record leading cross-functional teams, developing quality strategies, and translating insights into actionable roadmaps.

Expert in using data and user feedback to deliver experiences that drive retention.

Knowledgeable in Unity and Unreal engines, automation frameworks, and player first quality methodologies.

PROFESSIONAL EXPERIENCE

Quality Assurance Lead | Honeywell | Toronto, Ontario, Canada

Mar 2024–Present

- Leading quality initiatives for software projects impacting North American real-estate platforms with millions of users.
- Guiding cross-functional teams through 2-week release cycles, consistently delivering new features while maintaining quality standards across existing regression suites.
- Executing testing strategies for mobile and IoT connectivity solutions. Including a load testing initiative that identified 30+ API issues, and improved platform stability during high usage times.
- Collaborating with product management and engineering leadership to align roadmaps with delivery and expansion goals. With constant user data quality improvements in mind, strategies aligned with business objectives.

Quality Assurance Manager | Magic Media Studio | Remote, Canada

Jul 2022–Mar 2024

- Managed experiential quality across multiple game projects on Unity/Unreal engines, delivering to global platforms and digital storefronts, such as Sony, Microsoft, Nintendo, Epic, and Steam
- Worked with client stakeholders to build quality strategies for live service games, increasing visibility on high severity issue type bugs, which caused resolution time to lower from weeks to under 48 hours.
- Led a team of 8 senior QA professionals, and introduced player first quality practices across development teams using data-driven insights, taken from working together with community teams.
- Produced KPIs and quality metrics that informed testing priorities, and guided decision making based on player experience.

Project Manager & QA Lead | Cubos Tecnologia | Remote, Brazil

Mar 2021–June 2022

- Led agile development squads and managed end-to-end quality processes for Flutter-based mobile and web platforms serving healthcare users.
- Introduced quality metrics and dashboards to track product health, and development velocity, resulting in increased sprint predictability.
- Delivered process improvements in automation coverage (from 10% to 75%) and performance testing that enhanced user experience, drastically reducing user crash reports.

QA Project Coordinator – Unity Games | Wildlife Studios | São Paulo, Brazil

May 2020–March 2021

- Coordinated quality strategy for 3 existing live Unity games across iOS/Android platforms, managing testing workflows that supported 1M+ monthly active users.
- Established quality standards for prototype projects, with one successfully transitioning from prototype to full live service release.
- Created dashboards and risk assessment reports that increased visibility on regression issues across the whole department, reducing critical bug escape rate and improving development cycle efficiency.

Squad Leader / QA Analyst – Fintech Projects| Cubos Tecnologia | Salvador, Brazil

Mar 2019–May 2020

- Delivered Brazil's first Open Banking app. With hands-on leadership, managing a team of 12 members across design, engineering, and QA teams.
- Led team resourcing and performance while tracking the effectiveness of QA interventions.
- Implemented automated testing pipeline integration using Cypress, drastically reducing manual testing effort during new releases and regression.

Previous QA Roles | Capgemini • BRISA (LG Electronics) | Salvador, Brazil

Jan 2016–March 2019

- Contributed to enterprise QA initiatives across mobile and web ecosystems.
- Developed comprehensive UI and API test automation using Selenium, Appium, and Java, achieving 80% automation coverage and reducing regression testing times.
- Managed multi-language QA efforts across all Latin American markets.

EDUCATION

Algonquin College of Applied Arts and Technology | Ottawa, Canada

July 2024

Mobile Application Design and Development

Universidade Federal da Bahia | Salvador, Brazil
